DISCLAIMER: All investments in mutual and pension funds are subject to market risk. Past performance is not necessarily indicative of the future results. Please read the offering document to understand the investment policies and the risks involved. To avail tax rebate on mutual funds, a minimum investment holding period of two years from the date of investment is required. As per section 62 of Income Tax Ordinance 2001, an individual investor of open end mutual fund (unit trust schemes) can claim tax credit on investment up to Rs. 2,000,000/- or 20% of individual's taxable income (whichever is lower) on an investment made in Mutual Funds between July 1st and June 30th. As per section 63 of income tax ordinance 2001, an eligible person joining pension scheme at the age of 41 years or above, shall be allowed additional contribution of 2% per annum for each year of age exceeding 40 years up to 30th June, 2019 subject to the condition that the total contribution allowed to such person shall not exceed thirty percent of the total taxable income of preceding year. Withdrawal from pension fund before retirement shall have tax implication. Pre-mature withdrawal from pension funds is subject to tax. Lump sum withdrawal in excess of 50% at or after retirement age will be subject to tax. Note: Consult your tax advisor for more information.

From the CIO's Desk

The benchmark KSE 100 underwent a decline of 1% in March amidst listless trading with average volumes registering lowest levels since Jan-16. Investors remained on the sidelines awaiting clarity on the IMF program & results of FATF review, while higher than expected increase in interest rates further denting investor sentiments.

Foreigners turned net sellers, after being net buyers in the previous months, selling shares amounting to US\$17.8mn during the month, followed by mutual funds that disposed US\$10.7mn worth of equities. However, the selling pressure was absorbed by brokers, insurance and banks, being net buyers during the same period.

On the domestic macroeconomic front, the headline inflation for the month came at 9.4%, which was a tad above our expectations. The increase in retail inflation is attributed to the rise in food and non-alcoholic beverages segment. During the month, these segments posted an increase of 3.16% driven mainly by increase in food items such as chicken, tomatoes, fresh vegetables etc. However, core inflation (NFNE), which excludes volatile food and energy prices, clocked in at 8.5%YoY, falling from the previous month's level of 8.8%. Going forward, we expect inflation to remain high on account of Ramadan effect, quarterly house rent adjustment along with further rationalization of utility tariffs. Nonetheless, due to high base effect during remaining months of the fiscal year, average FY19 inflation should remain within SBP's forecast of 6.5%-7.5%.

The latest balance of payments numbers have been extremely positive as monthly current account deficit(CAD) declined by 59%MoM and 72%YoY, settling at just USD356mn, a 29 month low, in February. Reduction in CAD was broad-based with all heads showing improvement. During 8MFY19, CAD has declined by 23%YoY to USD 8,844mn. Going forward, we expect monthly CAD run rate to remain around USD600-700mn due to higher interest rates, significant PKR devaluation and fiscal measures to restrict imports.

Despite monetary tightening and exchange rate adjustments, lack of progress on addressing structural fiscal issues, as visible from 1HFY19 deficit of 2.7% (excluding off-balance sheet items) of GDP, effectively neutralizes the impact of the former measures. Notwithstanding a sizable 37% cut in development expenditures, the fiscal deficit has expanded on account of 17% increase in current expenditures and 2% fall in revenues. This imbalance needs to be permanently addressed for any meaningful consolidation efforts. We believe the government should urgently address issues including low tax revenue, losses of PSEs and uneven distribution of revenue/expenditure between provincial and federal governments to achieve macroeconomic stability.

With an impending IMF program in the offing, the market offers considerable value to investors with a medium to long-term horizon in view of attractive valuations and strong expected profitability growth over the next two years.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, Sukuks, and Islamic money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 499.24% (KMI- 30 Index: 307.09% since inception). This translates to an average annualized return of 22.29% p.a.(KMI-30 Index: 17.09% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

Disclaimer: This publication is for informational purpose only and nothing herein should be construed as a solicitation, recommendation or an offer to buy or sell any fund. All investments in mutual funds are subject to market risks. The NAV based prices of units and any dividends/returns/profit lock in thereon are dependent on forces and factors affecting the capital markets. These may go up or down based on market conditions. Past performance is not necessarily indicative of future results. Capital preservation only applies to the unit holders who hold their investments until maturity date. All returns are calculated assuming reinvested dividends. The calculation of performance does not include cost of sales load.

Al-Ameen Islamic Retirement Savings Fund

Fund Managers Report - March'19
