Market Review & Outlook

From the CIO's Desk

Fund Managers Report - October 2021

The local equity market exhibited significant volatility during October. With rising concerns on civil-military relationship, brewing uncertainty over the on-going IMF review and persistent PKR weakness against USD, the month started on a negative note and the benchmark KSE 100 Index underwent a correction of 3.7%MTD at one point. However, the emergence of much needed clarity on the political and external fronts later in the month led to a decent recovery with the Index finishing the month with a 2.9% gain. In particular, (i) USD4.2bn financial support package from Saudi Arabia (ii) increasing possibility of an agreement between the government and IMF on resumption of the current program (iii) civilian government's notification of appointment of key army personnel and (iv) accord between TLP and local authorities to end protests lifted investor sentiments.

The headline inflation for October arrived at 9.20%YoY and 1.90%MoM (above street consensus), taking 4MFY22 average inflation to 8.74% YoY. The monthly rise in NCPI was mainly on account of a sharp jump in perishable food inflation by 5.92% with higher chicken and vegetable prices mainly contributing to the rise in the constituent. Moreover, an uptick in electricity and quarterly house rent adjustment kept the housing group elevated (up 2.4%MoM). Transport constituent recorded an increase of 5.27% MoM mainly on the back of an uptick in motor fuel prices. The conjunction of economic recovery along with a significant increase in international commodity prices is putting upward pressure on domestic prices and PKR-USD parity. Going forward, inflationary pressures are likely to persist on account of rise in utility tariffs, further increase in fuel prices and second-round impact of commodity inflation on other prices. For FY22, we estimate headline inflation to average between 9.5%-10%. In the last monetary policy review meeting, the central bank increased its policy rate by 25bp. We expect another 50bp rise in the next monetary policy meeting. We foresee 150bp increase in interest rates in the current monetary policy tightening cycle.

The external current account for the month of Sep-21 posted a deficit of USD1,113 million as compared to a surplus of USD27 million during Sep-20 primarily on the back of a 53% YoY jump in imports. On an aggregate basis, the country's current account recorded a USD3.4billion deficit during 1QFY22 against a surplus of USD0.9bn during SPLY due to nearly doubling of goods trade deficit on account of higher imports. Pakistan's goods import bill rose by 64% YoY to USD 17.4 billion in 1QFY22 (1QFY21: USD 10.6 billion) both due to higher global prices and strong domestic demand. Going forward, we expect current account weakness to persist due to higher deficit on goods, services and income accounts. Based on our estimates, we think current account deficit should breach the upper bound of SBP stated target of 3.0% (of GDP) in FY22.

On the fiscal front, FBR collected PKR 1,841 billion during 4MFY22, 36.6% above target of PKR 1,608 billion. However, non-tax revenues remained significantly lower due to nominal collection under PDL. We await details of the renegotiated IMF staff agreement to update our fiscal outlook for the current year. For now, we expect the government to overshoot its FY22 budget deficit target of 6.3% of GDP on account of lower than target collection of non tax revenue and provincial surplus.

We maintain sanguine view on equities as the local bourse is currently trading at much discounted forward PE multiple of 5.3x as compared to historical PE of 8.0x. Also, market's current earnings yield differential with 10Y PIB yield is 7.9% (18.9% vs. 11.0%) which is much higher than the average yield gap of 1.1% over the last 15 years. Further, earnings growth is also expected to remain robust during the next 12 months. Large cap stocks in the banking, oil exploration, fertilizer and power sectors are trading at huge discount to their fundamental valuations. For patient investors, potential catalysts should eventually unlock enormous value in the above names and drive the next leg of stock market performance.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have UBL Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 733.17% (KSE100 Index: 349.97% since inception). This translates to an average annualized return of 20.27% p.a. (KSE-100 Index: 13.99% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
