Market Review & Outlook

Fund Managers Report - January'16

From the CIO's Desk

Year-on-Year CPI inflation continues to remain on the lower side and clocked in at 3.3% for January 2016. International commodity prices have been subdued for the past few months, and are expected to remain weak in the near future due to slowdown in Chinese economy and weak growth prospects in other large economies of the world. Even though the phasing of high-base effect will lead to some increase in inflation getting into CY'16, it is likely to remain under control.

The newly established Monetary Policy Committee decided to maintain the Policy Rate at 6.0%. SBP's decision to keep the rates unchanged, despite having the room for a cut, was likely based on pressures in the foreign exchange market. We feel that the interest rate cycle has bottomed out, and foresee the status-quo to be maintained for at least two quarters.

The KSE-100 Index was volatile in Jan'16, losing up to 9.2% at one point, before recovering to close at 31,299pts (-4.6%MoM). Despite a weak return, the PSX index managed to outpace MSCI EM and FM index which exhibited a return of -6.5% and -6.8%, respectively. Volatility in global markets following weakening Chinese macros coupled with fresh spell of bearish trend in oil prices (down 23% MoM during mid-Jan'16) remained the prime reasons behind negative returns at home. Foreigners remained on the selling side with a total net FIPI outflow of USD49.8mn, 45% higher compared to USD34.3mn in the preceding month, cumulating 7MFY16 net FIPI outflow to USD291mn. Barring cement which remains the only bright spot, all major sectors came in for heavy selling. Banks and telecom were the worst performing sectors in Jan-16.

However we have a positive outlook on the local equity market in medium-term. The low interest rates, higher GDP growth and strong corporate earnings growth is expected to fuel the equity market over the long-term. The fundamentals of the stock market are intact and the market is trading at a significant discount as compared to the regional peers. MSCI's probable reclassification of Pakistan into its Emerging market index, progress on China-Pakistan economic corridor and macroeconomic growth can lead to rerating of the market. Thus any corrections in the stock market should be viewed by long-term investors as opportunities to build stock market exposure. Low yields on fixed income securities and the positive outlook of the country's economy make it all the more important for investors to allocate a portion of their portfolios to equity.

UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for such times of volatile equity markets for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time.

We strongly recommend our investors to invest in Voluntary Pension Schemes in order to grow their long-term savings and achieve retirement security. We recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 420.5% (KSE-100 Index: 204.7%) since inception. This translates to an average annualized return of 33.3% p.a. (KSE-100 Index: 21.4% p.a.) - thus outperforming the KSE-100 Index by a huge margin.

Total	121.4				

Analysis

- Consumer Price Index (CPI) for Jan'16 went up by 0.21% on a MoM basis compared to a decline of 0.57% previous month translating into a CPI reading of 3.32% on YoY basis, slightly above the market consensus of 3% 3.10%. The average one year inflation stands at 2.81%. Quarterly house index adjustment was the main reason behind MoM uptick while the decline in Food subsegment kept the inflation in check.
- Foreign exchange reserves decreased by USD ~572bn during past one month to reach at USD ~20.5bn for the week ended 22nd Jan'16 mainly owing to scheduled debt repayments. Low oil prices coupled with decent inflow of remittances supported the current account during 1HFY'16 where deficit shrank considerably to ~1.3bn from ~2.5bn similar period last year.
- Despite an expected uptick in inflation in next two months mainly due to low base of last year, inflation is not anticipated as a concern in the short-term. Estimates suggest that CPI shall be down, as low as -0.05% to -0.10% on MoM basis in Feb'16, which will translate into a CPI reading of 4.15%-4.20% on YoY basis. Beyond Mar'16 inflation is expected to come down gradually and stand at below 2.5% by June'16. Therefore, a 50 bps cut in either of the next two monetary policies cannot be ruled out.

USF	4.73%	-1.39%			
KMI-30	-6.00%	-3.18%			
ASSF	0.74%	-0.97%			

Analysis

- KSE-100 index had a bumpy ride in Jan'16. Month closed with a negative return of 4.62% translating into FYTD loss of 9.01%. Global economic woes especially the China's dejected growth data, consistent decline in international oil prices and unfavorable developments on the local front like brokers' investigations dampen the market sentiment. Foreigners kept the selling stance intact and took hefty amount USD ~50mn out from the market on net basis.
- Among top ten heavy weights of the market, the Hub Power Company (HUBC) generated the highest return of ~-0.6% while Pakistan State Oil (PSO) attained the second spot with ~-1.1% return during last month. Among stocks in KSE-100 index, Ibrahim Fibres Limited (IBFL) generated the highest return of ~32% Pakistan Tobacco Company Limited (PAKT) with ~21% return.
- A status quo stance on policy rate provided an impetus to the banking sector. Improvement in local cement dispatches (despite a fall in exports) is expected to improve the earnings of cement companies. However, the overall market is expected to remain range bound due to uncertain political landscape and supply glut situation in global oil market.

UBL Money Market Fund

Fund Managers Report - January'16

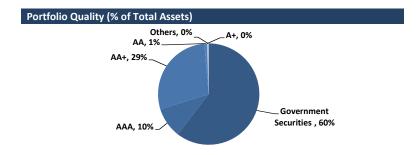

Investment Objective

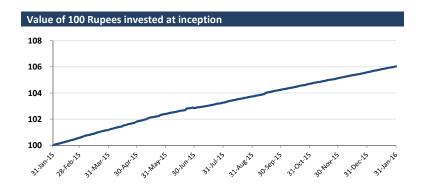

The objective of UBL Money Market Fund is to generate competitive returns within a low risk portfolio to provide a regular stream of income and easy liquidity to its investors by investing more than 50% of the portfolio in short term government securities
