To avail tax rebate on mutual funds, a minimum investment holding period of two years from the date of investment is required. As per section 62 of Income Tax Ordinance 2001, an individual investor of open end mutual fund (unit trust schemes) can claim tax credit on investment up to Rs. 2,000,000/- or 20% of individual's taxable income (whichever is lower) on an investment made in Mutual Funds between July 1st and June 30th.

As per section 63 of income tax ordinance 2001, an eligible person joining pension scheme at the age of 41 years or above, shall be allowed additional contribution of 2% per annum for each year of age exceeding 40 years up to 30th June, 2019 subject to the condition that the total contribution allowed to such person shall not exceed thirty percent of the total taxable income of preceding year.

**DISCLAIMER:** All investments in mutual and pension funds are subject to market risk. Past performance is not necessarily indicative of the future results. Please read the offering document to understand the investment policies and the risks involved. Withdrawal from pension fund before retirement shall have tax implication. Pre-mature withdrawal from pension funds is subject to tax. Lump sum withdrawal in excess of 50% at or after retirement age will be subject to tax.

Note: Consult your tax advisor for more information. The benefits shown in the table are calculated based on Maximum investments subject to respective income brackets as defined in ITO 2001. For VPS the taxable income for previous year is assumed as same as current year. The Tax credit calculation is based for person of 40 years. As per Section 62 and 63 of ITO 2001.

## From the CIO's Desk

The benchmark KSE 100 Index lost 4.3% in February as the local equity market failed to carry forward strong momentum of the the previous month (up 10.1%) mainly due to rising tensions with India and a disappointing earnings season. Though the market started the month on a positive note, ignoring an unexpected 25bp hike in interest rates, sentiments turned negative following Pulwama attack and subsequent tit for tat airstrikes and border skirmishes along LOC between the two neighbors. While below-expected results of some major companies and absence of dividend pay-outs further dampened investor spirits. Providing crucial support to the market, foreign investors did not panic and remained net buyers to the tune of USD32mn during the month as selling remained concentrated among local mutual funds and brokers.

On the domestic macroeconomic side, headline inflation for February came at 8.2%YoY which was in line with our expectations. This has been on account of higher food prices, mainly tomatoes (150%MoM increase) due to supply constraints. Encouragingly, core inflation which excludes volatile food and energy component remained nearly unchanged at 8.8%YoY. Going forward, inflationary pressures could remain elevated over the next few months due to Ramadan effect, some further hike in utility tariffs and impact of currency devaluation. However, headline numbers should remain contained as high-base effect kicks in during the last quarter of the fiscal year. For FY19, we expect CPI inflation to remain well within SBP forecasts of 6.5%-7.5%. The current account deficit (CAD) for January came at USD809mn, plunging by 51%YoY, on the back of considerable improvement in services and goods balance and steady growth in remittances. We expect improvement in current account to continue due to slowing domestic demand as monetary and exchange rate adjustments take further hold.

However, recently released budgetary numbers for 1HFY19 reveal that fiscal issues remain unaddressed. Notwithstanding significant monetary policy tightening and exchange rate depreciation carried out to address macroeconomic stresses, fiscal policy continues to remain expansionary, largely neutralizing the impact of other two policy levers on domestic demand. The fiscal deficit for 1HFY19 increased to 2.7% of GDP, a 5 year high due to sizable growth in current expenditures which more than offset 36% decline in development spending. We believe the government should urgently address fiscal issues, such as a low revenue base, PSE losses and uneven revenue/expenditure distribution between federal and provincial governments, to achieve macroeconomic stability.

In the short-term, the market will take direction from further developments on current Pakistan-India stand-off and progress on IMF-Pakistan talks on a fresh funding program. Despite any short-term hiccups, the market offers considerable value to investors with a medium to long-term horizon in view of attractive valuations and strong expected profitability growth over the next two years.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, Sukuks, and Islamic money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 516.61% (KMI- 30 Index: 321.21% since inception). This translates to an average annualized return of 22.92% p.a.(KMI-30 Index: 17.72% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

# Historical Performance

Disclosure as per SECP's SCD Circular No. 16, 2014  
Fund Managers Report

The periodic returns for the funds have been presented below as per SECP's SCD Circular No. 16 dated July 03, 2014. The returns presented below are:

- Yearly returns for the last five fiscal years, and
- Absolute returns for every fiscal year since inception

The returns have been annualized for money market, income and aggressive income schemes where the performance evaluation period is less than one year.
