From the CIO's Desk

The benchmark KSE 100 lost 2.20% in the month of May, taking the FY19TD decline to 14.1% as concerns over stringent budget under an IMF program and rising political tensions kept investors jittery. In the initial phase of the month, the market dipped sharply. However, the local bourse subsequently witnessed a recovery of 8.5% from its intra-month low of almost 33,167 points. The turnaround was mainly driven by the announcement of a market support fund to be launched by the government. The market closed the month at 35,975 points.

On the macroeconomic front, the government has hitherto failed to rein in the burgeoning fiscal deficit which is partly neutralizing the impact of monetary and exchange rate adjustments on aggregate demand. FY19 fiscal deficit is now projected to rise above 7.0% of GDP due to dismal revenue performance and rising current expenditures. With a large part of the economy undocumented and/or under-taxed, Pakistan has incredible room for revenue generation as reflected in low tax to GDP ratio of 10%. Any credible improvement in revenue mobilization, along with expenditure rationalization, should allow for a more sustained path for growth in the long term despite near term pain. On a positive note, budget for the next fiscal year is likely to target aggressive taxation measures & fiscal reforms in view of current government's recent focus on revenue mobilization efforts too meet IMF stipulated primary deficit target of 0.6% of GDP.

For the month of May, the CPI inflation increased by 9.1% as compared to 8.8% in the previous month and 4.2% in April 2019. The above was mainly driven by a surge in fuel prices and higher food inflation partly due to "Ramadan" factor that contributed to the jump in perishable food prices. The central bank in a surprise move raised the discount rate by 1.5% to 12.25% in May's MPS to preempt inflationary pressures from exchange rate depreciation, impending tariff hikes and burgeoning fiscal deficit. However, we think there is no need to further increase rates in view of weakening global commodity prices, expected austerity and revenue measures in the new budget and projected average inflation of ~10% in FY20.

Though significant monetary tightening and exchange rate adjustment have resulted in shrinkage in current account deficit (CAD), external account pressures still remain formidable as reflected in monthly CAD of USD1.24bn for April 2019. In our opinion, the government cannot achieve external sector stability sans a meaningful contraction in fiscal deficit.

Pakistan has reached a staff-level agreement with IMF for a 3-year Extended Fund Facility (EFF), which will enable it to get USD6bn over a period of 39 months. The program aims to support Pakistan to reduce domestic as well as external imbalances, increase transparency, improve business environment and remove impediments to the growth of the economy. This program will allow further flows from other multilateral agencies i.e. ADB & World Bank. Moreover, an IMF backed reform agenda would be perceived as more credible allowing Pakistan to raise funds at favorable rates through issuance of Eurobonds & induce foreign flows in the form of portfolio and foreign direct investment. Historically the entry into the IMF program is followed by improving NFAs and market performance.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 452.00% (KMI-30 Index: 274.42% since inception). This translates to an average annualized return of 20.74% p.a. (KMI-30 Index: 15.68% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
