Analysis

- Based on new base year, average headline inflation for the month of Aug'19 reached to 10.5%. On month-on-month basis, it increased by 1.6% in August 2019 as compared to an increase of 1.8% in the previous month and a decrease of 0.3% in August 2018. The increase in CPI for the month was because of higher perishable food items and higher gas tariff.
- On external front, current account deficit (CAD) for the July settled at USD 579mn exhibiting a hefty decline of 73% YoY. We believe, the monthly CAD run rate is still high and needs to be brought down to below USD500mn to achieve external account stability.
- The central bank in its last monetary policy meeting decided to increase the interest rates by 100bps, however the central bank is yet to announced its latest monetary policy in September, where a status quo or a rate cut can be anticipated after a decrease in inflation for the month. The central bank dismissed the hawkish view about the interest rates in the months forward, stating that the cycle of interest rate increase has phased out and further increase shall largely depend on inflation figures.
- Pakistan's FX position continued to remain weak with latest reserves settling at USD 15.6bn for Aug'19. The reserves shall remain under pressure because of large repayments scheduled.

Equity Market Review & Outlook

Performance of 10 stocks with highest weights in KSE-100 index

	FYTD	CYTD
KSE-100 Index	-12.5%	-20.0%
USF	-13.7%	19.6%
KMI-30 Index	-14.6%	-24.4%
ASSF	-14.5%	-23.8%

Analysis

- The equity market lost 7.1% MoM for the month of Aug'19. Kashmir conflict, subdued corporate earning results and high fiscal deficit (8.9% of GDP) for FY19 damped the investor sentiment.
- The negative investor sentiments have peaked out and the market is expected to recover, as the implementation of structural and economic reforms have started to reap some fruits. In addition to this, REER closing to 91 signifying currency is likely to remain stable; we believe that interest rates are close to their peak and reversal can be expected at the end of FY20.

Investment Objective

The objective of UBL Money Market Fund is to generate competitive returns within a low risk portfolio to provide a regular stream of income and easy liquidity to its investors by investing a major chunk of the portfolio in short term government securities.
