Fund type: open-ended, category: capital protected scheme risk profile: Low risk, benchmark: an average of 6 months PKRV rates. investment may take more than a month to be deployed according to the allocation strategy. *The Tax credit are as per Section 62 of ITO 2001. AMC Rating AM1

From the CIO's Desk

The benchmark KSE Index lost 5.8% (i.e. 1,963 points) in July, extending its losing streak to 6 months and bringing CYTD return to -13.8%. Negative catalysts for the month included adverse ICSID decision on the Reko Diq case accruing a liability of USD5.9bn, further monetary tightening of 100bps, some major results undershooting street consensus and rising investor concerns on tough conditions attached with the new IMF Program. The inability of the government to follow through with the expected bailout fund, the PKR 200bn energy sukuk and resolution of the GIDC further added to the uncertainty. Furthermore, average daily traded value and volumes fell to Rs2.8bn and 77mn respectively, a multi-year low.

Mutual funds continued to remain major sellers amidst thin volumes, offloading shares worth US$40mn as risk off trade and attractive fixed income yields shifted flows out of equities. Foreigners however softened the landing, mopping up shares worth USD30mn with buying concentrated in cements, banks & power utilities. Major drag to the Index came from E&Ps (-4.8%), banks (-4.0%), OMCs (-11.8%) engineering (-17.7%) & refineries (-18.4%).

The headline inflation touched double-digit figure of 10.34% for the month of July in line with street consensus. Major drivers for inflation included one-off utility tariff adjustments, recently announced budgetary measures and quarterly house rent adjustment. The inflation was largely in line with our expectations and we expect it to remain in low double digits in the coming months before softening in early FY20. The June current account deficit (CAD) witnessed a decline of roughly 50%YoY, settling at USD 995mn. For the full fiscal year, CAD narrowed by 32% to USD13.6bn, due to 6% increase in remittances, 11% decline in goods trade deficit and a sizable 30% fall in services balance. The monthly CAD run rate is still high and needs to be brought down to USD500-600mn to achieve external sector stability.

On the international front, the Fed in a widely anticipated move cut rates by a quarter point to cushion the economy from a global slowdown and rising trade tensions between US and China. Going forward, the Fed may continue with a liberal monetary policy in the wake of intensifying trade hostilities and increasing risks of a currency war. This move has afforded room for emerging economies to loosen or delaying their monetary tightening. Further, oil and other commodity prices have responded with a sharp downward move which could turn out to be a boon for net commodity importers like Pakistan.

The equity market has discounted numerous positives amidst thin volumes and continuous selling by local participants. The government has embarked upon major revenue reforms which should eventually ease the fiscal stress faced by the economy. In the aftermath of massive currency devaluation last year, the real effective exchange rate is now close to 90. Hence, local currency is likely to remain relatively stable going forward which could attract foreign flows. Notwithstanding any major fiscal slippages or exogenous shocks, inflation and interest rates are likely to peak out soon. Moreover, the country is finally making serious efforts to get out of the grey list in the upcoming FATF review in October. Finally, subdued commodity prices and lower global interest rates could hasten a local rate reversal. The above, in the backdrop of undemanding valuations where KSE-100 is trading at a forward PE of 5.9x, offers a lucrative entry point to build equity positions.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 383.46% (KMI-30 Index: 225.14% since inception). This translates to an average annualized return of 18.61% p.a.(KMI-30 Index: 13.62% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
