## **2. INVESTMENT OBJECTIVES, INVESTMENT POLICY, RESTRICTIONS, RISK DISCLOSURE AND DISCLAIMER**

### **2.1 Investment Objective**

The investment objective of UBL Capital Protected Fund - III (UCPF-III) is to protect the principal investment of the investors upon maturity by placing a significant portion of the Trust Property as TDR with a minimum AA- rated Bank, and remaining in equity market or any other SECP permitted investments to provide investors with better returns.

#### **2.1.1 Investment Policy**

**UBL Capital Protected Fund - III**, in line with its Investment Objectives, will invest in Authorized Investments.

##### **a) Capital Protected Segment**

The Fund shall invest 84.31% of the Net Assets of the Fund in a Term Deposit, with UBL Bank (rating AAA+), such that Term Deposit grows equivalent to the "Principal investment" in the Fund upon maturity in 3 years.

In case the rating of the financial institution (UBL Bank Ltd) falls below 'AA-' or institution is placed on watch list during the life of the Fund, the investment may at any time be realized at the discretion of the Management Company but only to reasonably protect the interest of the Unit-Holders in such a manner that maintains the capital protection of the Scheme after notifying the SECP and the Trustee. Investment would be realized in case the rating of the financial institution is downgraded to BBB.

If the investments in the Capital Protected Segment are realized on a date close to but before the Maturity of the Scheme, the funds so realized will be invested in short term instruments such as bank account with 'AA-' or better rated Banks.

##### **b) Investment Segment**

The Net Assets remaining after placement of the Capital Protection Segment shall be actively invested in Equities, Spread Transactions and any other SECP approved investment avenues, to enhance the return of the Fund.

The primary aim of the Fund's investment policy shall be to determine the mix of fixed income, equities and money market instruments that offers the potential to maximize returns keeping in view its relatively low risk profile as a capital protected product. The proportion of asset allocation shall be based on the expected returns and risks as evaluated by the Management Company and asset allocation of Investment Segment and may change from time to time as the Management Company deems fit.

##### **Benchmark**

Weighted Average Daily Return of KSE-100 Index and Three (3) Months Deposit Rate of a Double A minus (AA-) or above rated Bank based on the Fund's actual Proportion in the Investment Segment and Capital Protection Segment.

		Minimum	Maximum
1	Term Deposit Receipts, with a AA- (minimum rating at the time of placement) rated Commercial Bank	84.3%	100%

3	Spread Transactions	0%	15.1%
4	Cash and Near Cash Instruments which include cash in bank accounts (excluding TDRs), and treasury bills not exceeding 90 day maturity	0.60%	15.7%

\* The exposure limits defined in the table, reflect the positions on the first day of the Fund. These exposure limits may change during the life of the fund.

**2.1.2 Risk Control in the Investment Process**

Investment process requires disciplined risk management. The risk control process also involves reducing concentration risk of the investment segment through portfolio diversification. UCPF - III believes that this diversification would help achieve the desired level of consistency in returns.

Investors must realize that all investments in mutual Funds and securities are subject to market risks. Our target return / dividend range cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

- (1) Equity Risk** - Companies issue equities, or stocks, to help finance their operations and future growth. The Company's performance outlook, market activity and the larger economic picture influence the price of a stock. Usually when the economy is expanding, the outlook for many companies is good and the stock prices may rise and vice versa.
  - (2) Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
  - (3) Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk. Each can have negative impact on the value of the income and money market instruments including Sukuks etc.
- ☐ **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;

- ☐ **Credit Spread Risk** - The risk that there may be an increase in the difference between the return/markup rate of any issuer's security and the return/markup rate of a risk free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments;
- (4) Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
- (5) Liquidity Risk** - Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (6) Settlement Risk** - At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund's performance etc.
- (7) Reinvestment Rate Risk** -In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (8) Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
- (9) Redemption Risk** - There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working days of receiving a request for redemption from the investor.
- (10) Distribution Taxation Risk** - Dividend distribution may also be liable to tax because the distributions are made out of the profits earned by fund and not out of the profits earned by each Unit Holder. Unit Holders who invest in a fund before distribution of dividends may be liable to pay tax even though they may not have earned any gain on their investment. (missing some words)

- 2.4.1 There may be times when a portion of the investment portfolio of the Scheme is not compliant either with the investment policy or the minimum investment criteria of the assigned 'category'. This non-compliance may be due to various reasons including, adverse market conditions, liquidity constraints or investment - specific issues. Investors are advised to study the latest Fund Manager Report specially portfolio composition and Financial Statements of the Scheme to determine what percentage of the assets of the Scheme, if any, is not in compliance with the minimum investment criteria of the assigned category. The latest monthly Fund Manager Report as per the format prescribed by Mutual Funds Association of Pakistan (MUFAP) and financial statements of the Scheme are available on the website of the Management Company and can be obtained by calling / writing to the Management Company.
