Market Review & Outlook

From the CIO's Desk

Fund Managers Report - October 2023

The local bourse delivered stellar performance in October as depicted by a 12% increase in the benchmark KSE-100 index during the month. After a 6-year hiatus, the market closed above 50,000 level with investor confidence buttressed by increasing clarity on politics/economy and an improving macroeconomic outlook. Trading activity also remained quite healthy, with the average daily traded value and volumes rising by 103%M/M and 125%M/M respectively. Notwithstanding the recent run-up, PSX is trading at very cheap multiples (PE 4.1x) and could significantly re-rate over the next 12 months.

On politics, general elections are slated to be held on 8th February, 2024 which should be followed by handing over of power to an elected government. On the macroeconomic front, government has comfortably met all performance criteria for the current review which should result in imminent release of next tranche and other multilateral/bilateral flows. Inflation and interest rates have also peaked and should be on a firm downward trajectory during 2HFY24 and beyond. Balance of payments position looks manageable, underpinned by a contained current account deficit and sufficient flows on the financial account. A manifestation of the above, PKR appreciated 2.2% against the greenback in the month of October, taking the cumulative appreciation to 9.1% from a high of PKR 307/USD in September. Fiscal outlook has also improved, bolstered by strong revenue growth and controlled non-interest expenditures.

CPI for the month of October recorded a Y/Y increase of 26.9% against 31.4% in September 2023. Barring any external shocks, we expect high base effect and a favorable trend in M/M readings to help keep inflation on a downward trajectory going forward with headline numbers reaching 17-18% by the end of FY24. The Monetary Policy Committee of the State Bank of Pakistan, keeping the policy rate unchanged at 22% in the recent meeting, has stated their view that the real interest rate is "significantly positive on 12-month forward-looking basis". The committee has acknowledged that the inflation is in line with their expectations and is expected to continue its downward trajectory, however, they have emphasized the need for continued fiscal consolidation and timely completion of the upcoming IMF-SBA to strengthen the external position. We expect monetary easing by the SBP to start in the 2HFY24.

The current account posted a minuscule deficit of USD8mn in September, resulting in a cumulative current account deficit of USD 947 million for the first quarter of FY24, in contrast to USD 2.25 billion in the corresponding period of FY23. The decrease stemmed primarily from a sizeable reduction in trade deficit attributed to a 39% Y/Y decrease in imports. Looking ahead, we anticipate that current account deficit will remain well-contained for the entire fiscal year, owing to reduced demand and stable commodity prices.

"Fiscal operations in the first quarter of FY24 were supported by revenue measures implemented in the budget, resulting in a primary surplus of 0.4% of GDP. This is primarily attributed to a robust 33% year-on-year growth in total revenue, driven by impressive increase of 24% in tax revenue and a remarkable 99% surge in non-tax revenues, and restricted non-interest expenses. However, massive debt servicing owing to historic high interest rates led to an overall budget deficit of 0.9% of GDP. Markup payments consumed up to 98% of the net federal receipts allowing for limited flexibility in other areas of current and development expenditure. Continued fiscal consolidation is the need of the hour, as recommended by the IMF which will help maintain the downward trajectory of inflation in the short to medium term.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 771.44% (KMI-30 Index: 467.26% since inception). This translates to an average annualized return of 17.41% p.a. (KMI-30 Index: 13.73% p.a.) - thus outperforming the KMI-30 Index by a significant margin.
