2.1 Investment Objective

The investment objective of the Fund is to earn competitive riba free return by investing in various shariah compliant asset classes/instruments based on the market outlook.

2.2 Risk Tolerance

Risk Tolerance of the Fund will be moderate. Since the Fund may potentially invest in risky shariah compliant asset classes such as corporate bonds/sukuks, stocks, etc. The Fund is suitable for investors with at least two to three years of investment horizon.

2.3 Investment Policy⁶

The Fund shall invest only in Authorized Investments. The Fund's investment strategy shall be based on fundamental analysis of allowable asset classes in the Fund

⁶ Authorised Investment Table Amended In point #1 In the Third Supplemental To The Offering Document dated October 03, 2015.

INVESTMENT PROCESS:

The fund will dynamically allocate its portfolio between different classes of shariah compliant assets (i.e. equities, fixed income, and money market instruments) based on macroeconomic view and outlook of the asset classes.

On the equity side, fund will primarily allocate its portfolio in defensive dividend yielding shariah compliant stocks. The fund may also invest in shariah compliant stocks with strong fundamentals coupled with high growth prospects based on the outlook. Focus on undervalued shariah compliant stocks: stocks that are expected to offer growth and those which offer high dividend yield potential.

On the fixed income side, the Fund Investment Process will be based on fundamental credit analysis of shariah compliant securities or transaction. They may be deemed suitable to be held either in their own right or integrated with various yield curve / sector strategies that would decide the priority and place in the investment structure.

RISK MANAGEMENT:

AIAAF intends to mitigate four key risks in the Fund through the Investment Policy parameters which are as under:⁷

- (a) **Credit Risk⁸:** This risk is mitigated through the Investment Policy parameter whereby the fund only invests in instruments and bank deposits, which carry minimum A Minus (A-) from a credit rating agency duly approved by the Commission.
- (b) **Interest Rate Risk:** A moderate level of interest rate risk is a part of the investment strategy of the Fund. However, in order to avoid excessive interest rate risk, the Duration (interest rate sensitivity) of the Fund will not exceed four (4) years.
- (c) **Liquidity Risk:** A moderate exposure to relatively illiquid investments (e.g. long-term bonds, small-cap stocks etc.) is a part of the investment strategy of the Fund. However, in order to avoid excessive liquidity risk, the Fund will, at all time, invest at least 10% of its Net Assets in Shariah Compliant Cash and Cash Equivalents. Also, the weighted average time to maturity of the Fund's shariah compliant fixed income portfolio will not exceed five years;
- (d) **Market Risk:** This risk involves volatility in equities and debt instruments resulting from their dependence on market sentiment, speculative activity, supply and demand for the securities and liquidity in the market. The volatility in securities prices results in volatility in the NAV based price of the Unit of the Fund. The objective is to mitigate the risk through timely asset allocation decisions. A moderate level of Market Risk is a part of the investment strategy of the Fund. However, the Fund will attempt to contain the overall volatility of the portfolio through adequate diversification.

The risks emanate from various factors that include, but are not limited to:

- (1) Equity Risk** - Companies issue equities, or stocks, to help finance their operations and future growth. The Company's performance outlook, market activity and the larger economic picture influence the price of a stock. Usually when the economy is expanding, the outlook for many companies is good and the stock prices may rise and vice versa.
- (2) Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (3) Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk. Each can have negative impact on the value of the income and money market instruments including Sukuks
 - **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
 - **Credit Spread Risk** - The risk that there may be an increase in the difference between the return/markup rate of any issuer's security and the return/markup rate of a risk free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments;
- (4) Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
- (5) Liquidity Risk** - Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (6) Settlement Risk** - At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund's performance etc.
- (7) Reinvestment Rate Risk** - In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (8) Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in taxlaw.

- (9) Redemption Risk** - There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working days of receiving a request for redemption from the investor.
