# Market Review & Outlook

From the CIO's Desk

Fund Managers Report - July 2025

The domestic equity market exhibited very strong performance in July as captured in 11% rise in the benchmark KSE 100 Index to 139390 level during the month. Sovereign rating upgrade by S&P from CCC+ to B-, growing warmth in US-Pakistan relationship and a favorable macroeconomic backdrop (comfortable BOP position, low inflation, improving high frequency indicators etc.) were key drivers of the aforesaid rally at the local bourse. However, foreigner investors continued to trim their positions, selling shares worth USD31.8mn during the month. Among local investors, mutual funds and individuals were main buyers mopping up shares amounting to USD64.8mn and USD34.7mn respectively, while banks/DFIs sold shares worth 54.5mn.

CPI inflation for July came above expectations at 4.2%Y/Y, due to a significant 2.9% jump in M/M inflation mainly driven by higher food prices, revision in electricity and gas rates and upward revision in retail fuel prices. In the latest monetary policy meeting held on July 30, SBP decided to keep its policy rate unchanged at 11.0% citing slightly worsening inflation outlook due to higher than anticipated increase in energy prices, an expected widening of trade deficit in FY26 due to a pick-up in economic activity, volatile crude oil prices and uncertainty on US trade tariffs for its cautious stance despite considerably positive real interest rates.

In July, bond yields declined primarily on expectations of a potential interest rate cut. However, yields rebounded slightly following the central bank's decision to keep the policy rate unchanged. Despite this, overall yields settled below the levels observed in the previous month.

In the secondary market, yields on the 3-year and 5-year tenors fell by 3 basis points (bps) each, while the 10-year PIB saw a more pronounced decline of 20 bps, ending the month at 11.12%, 11.37%, and 12.10%, respectively.

The short end of the yield curve also shifted downward. Notably, the yields on 3-month and 6-month Treasury bills dropped by 16 bps and 7 bps, closing at 10.85% and 10.82%, respectively. The 12-month tenor remained largely stable, finishing the month at 10.84%.

Looking ahead, money market funds remain an attractive option for short-term allocations, offering relatively low volatility and competitive returns.

The current account posted a surplus of USD328mn in June, taking FY25 current account balance to a positive USD2.1bn vis-à-vis a deficit of USD2.1bn recorded during SPLY. The aforesaid improvement was brought about by robust worker remittances (up 27%Y/Y) which more than compensated for higher goods trade deficit (+21%Y/Y). Flows under financial account, after remaining constrained till May, significantly jumped in June leading to a healthy overall BOP surplus of USD3.7bn for the fiscal year resulting in a sizable jump in SBP foreign exchange reserves to USD14.7bn at year-end. Fiscal deficit for FY25 came at 5.4%, a nine year low, due to strong revenue growth (+36%Y/Y) driven by 26%Y/Y jump in FBR taxes and robust SBP profit (up 169%Y/Y). While expenditure growth remained at 18%Y/Y due to a contained increase in interest expenses (up 9%) on falling interest rates, a stable currency and slower increase in public debt.

In the near term, market should take direction from progress on resolution of energy sector circular debt and any positive rating action by Moody's which has yet to update its sovereign rating on Pakistan. Nevertheless, in view of improving macroeconomic outlook and low yields on other investment avenues, equity valuations remain attractive from a medium to long-term perspective.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 2260.86% (KMI-30 Index: 1166.05% since inception). This translates to an average annualized return of 23.06% p.a. (KMI-30 Index: 18.13% p.a.) - thus outperforming the KMI-30 Index by a significant margin.
