Market Review & Outlook

From the CIO's Desk

Fund Managers Report - June 2025

Notwithstanding heightened volatility, the local equity market depicted healthy performance in June as captured in 5% rise the benchmark KSE100 Index during the month. Taking cue from a market friendly budget, the local bourse made decent gains in the initial trading sessions of the month. However, escalating Iran-Israel-US conflict dragged the market down during the middle of the month. Later, announcement of a ceasefire by President Trump restored investor confidence, triggering a rally during the last week of the month. Foreigner investors continued to offload their positions, selling shares worth USD37.6mn during the month. Among local investors, individuals and companies were main buyers accumulating shares amounting to USD22.3mn and USD15.8mn respectively.

CPI inflation for June came at 3.2%Y/Y, taking FY25 average inflation to 4.5%, significantly below 23.4% for FY24. The aforesaid deceleration was mainly brought about by lower food prices, especially wheat, and softer trend in utility and retail fuel prices. In the latest monetary policy review meeting held on June 16, SBP kept its policy rate unchanged at 11.0%, citing improving economic activity and rising trade deficit, uncertainty created by regional conflicts, likely pressure on trade balance due to recently announced budgetary measures and continuing transmission of significant rate cuts in the current easing cycle for its status quo decision.

In June, bond yields edged lower, driven in part by easing geopolitical tensions following the ceasefire between Iran and Israel. In the secondary market, yields on the 3-year and 5-year tenors declined by 14 basis points (bps) and 18 bps, settling at 11.15% and 11.40%, respectively. Conversely, the yield on 10-year government bonds rose by 7 bps to 12.30%, primarily due to a higher cut-off in the PIB auction.

The short end of the yield curve also experienced a downward shift, particularly in the 6-month and 12-month Treasury bills, which saw declines of 9 bps and 24 bps, ending the month at 10.89% and 10.85%, respectively. However, the 3-month tenor recorded a slight uptick of 8 bps, closing at 11.01%.

Looking ahead, income and sovereign funds appear well-positioned to capitalize on potential monetary easing and improved accruals. Meanwhile, money market funds continue to offer an attractive avenue for short-term allocations, thanks to their inherent stability and liquidity.

The current account posted a small deficit of USD103mn in May, taking 11MFY25 current account balance to a positive USD1.8bn vis-à-vis a deficit of USD1.6bn recorded during SPLY. The aforesaid improvement was brought about by robust worker remittances (up 29%) which more than compensated for higher goods trade deficit (+22%). We expect current account balance to post a decent surplus for full fiscal year on the back of healthy remittances. Flows under financial account remained constrained till May, leading a smaller overall BOP surplus of USD592mn during 11MFY25. However, as expected by SBP, loan inflows jumped significantly during June with SBP foreign exchange reserves reportedly finishing at USD14.5bn at year-end. On the fiscal side, despite two downward revisions, FBR missed its FY25 revenue collection target by nearly Rs163bn, collecting Rs11.73tn against revised target of Rs11.90tn. However, the collection was up by a healthy 26% from FY24.

In the near term, market should take direction from progress on resolution of energy sector circular debt, regional geopolitics and any update on proposed US tariffs. Nonetheless, in view of improving macroeconomic outlook and low yields on other investment avenues, equity valuations remain attractive from a medium to long-term perspective.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 2131.71% (KMI-30 Index: 1088.76% since inception). This translates to an average annualized return of 22.74% p.a. (KMI-30 Index: 17.75% p.a.) - thus outperforming the KMI-30 Index by a significant margin.
