From the CIO's Desk

Shaking off lackluster performance over the last few months, the local bourse churned out a healthy return in April as captured in 2.4% rise in the benchmark KSE-100 Index during the month. During the first half of April, the market remained jittery, losing further ground on prevailing uncertainty on Panama Case Decision. However, a day before the announcement, the market took a U-turn as local mutual funds, lured by attractive valuations and betting on a favorable court ruling, piled in. The court decided not to immediately disqualify the PM and formed a committee to further investigate the case within sixty days. Taking it positively, local mutual funds stepped in with full strength, causing a sharp run-up in stock prices. However, the rally petered out in the last few trading sessions of the month on renewed concerns on eventual outcome of Panama Case and reemergence of Dawn Leaks issue.

Among listed sectors, Autos and Parts performed exceptionally well on strong results and earnings outlook. While Chemicals and Electricity were major laggards on weak prospects and absence of payouts. On a note of caution, buying remained overwhelmingly restricted to mutual funds (USD108mn) which single-handedly absorbed sizable selling by foreigners (USD36mn), retail investors (USD53mn) and banks (USD20mn).

Contrary to general expectations, headline inflation increased by 4.8%YoY and 1.4%MoM in April. This was mainly on account of increase in the prices of perishable food items, rise in education expenses and quarterly revision in house rents. Inflationary pressures are likely to remain elevated in the coming month as well due to expected pre-Ramadan strength in food item prices. However, FY17 average CPI inflation should remain comfortably within SBP projections of 4.0-5.0%. Thus, we see no change in central bank's monetary policy stance in the next monetary policy review meeting. However, country's current account deficit, widening by 161%YoY to USD6.13bn in 9MFY17 from USD2.35bn in 9MFY16, continues to remain a source of concern in the medium-term.

Internationally, geopolitical tensions remain high in the Korean Peninsula with Washington and Pyongyang continuously trading inflammatory rhetoric. In Europe, the upcoming French presidential elections would decide the fate of European Union and Euro. Global oil prices continue to trade in a narrow band with higher OPEC compliance with agreed output cuts balancing against rising US shale output. We expect oil prices to remain range-bound within USD 45-55/bbl band in foreseeable future.

In the immediate future, the stock market will take direction from developments on upcoming budget, daily news flow and progress on Dawn Leaks and Panama Case investigation and foreign flows related to PSX's MSCI EM upgrade later in the month. However, notwithstanding any short-term hiccups, we expect the stock market to deliver healthy return in the medium-term with our view premised on Pakistan's improving macroeconomic fundamentals, decent stock market valuations, robust corporate-profitability growth and low yields on debt avenues.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, Sukuks, and Islamic money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in Islamic Voluntary Pension Schemes (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 679.1% (KMI-30 Index: 443.1%) since inception. This translates to an average annualized return of 34.2% p.a. (KMI-30 Index: 27.4% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
