From the CIO's Desk

The benchmark KSE 100 Index took a breather (-1.84%MoM) in February after a strong start to CY18 last month (+8.8% in Jan'18). Heightened political noise, rising external account pressures, deteriorating Pakistan-US relations along with the country's re-entry in FATF's grey list from June overwhelmed market's resilience in the earlier part of the month amidst a general global equity sell off. Moreover, foreigners remained net sellers, offloading shares worth USD32mn during the month, after showing strong buying interest in the previous month. A hitherto lackluster earnings season also had little to offer to the investors.

On the macroeconomic front, headline inflation continues to remain subdued, clocking at just 3.8%YoY in February. The average CPI on FYTD basis stood at 3.8% well below SBP's full year target of 6%. We expect CPI inflation to remain muted in the next 2-3 months on account of subdued food prices and positive base effect. However, second-round impact of higher oil prices and food price pressures in the month of Ramadan are likely to push inflation higher by May/June. The 7MFY18 current account deficit widened to USD9.1bn against USD6.2bn SPLY. The heightened CAD was mainly on account of high trade deficit following rise in imports (+18%YoY). External account challenges remain formidable warranting holistic policy action from the government.

Last month, SBP in its monetary policy meeting decided to raise policy rates by 25bps to 6.0% putting an end to the 20-month monetary easing cycle. Going forward, we expect SBP to stay the course and further increase discount rate by 50-75bps in CY18. On the fiscal side, the government recorded a +17.7% growth in provisional revenue collection for 8MFY18. The authorities are contemplating a tax amnesty scheme that could potentially fetch a few billion dollars and provide some respite on the external account where FX reserves continue to deplete at a fast rate.

During February, global equities witnessed wild swings in the backdrop of expectations of an end to benign monetary policy environment that had caused a run-up in asset prices over the last decade. Furthermore, US President's trade protectionist rhetoric further added to uncertainty. International oil prices settled slightly lower with Arab light declining 3.5%MoM on account of higher than expected US inventory build-up and weaker factory activity numbers reported by large Asian economies. Given Pakistan's significant dependence on imported fuel, oil prices hold a significant bearing on country's growth prospects.

Going forward, any positive development on the political front following senate elections will be favorably welcomed by the market participants. Any progress on tax amnesty scheme will be another short-term trigger. Advancements on the USD62bn CPEC project and government focus, both at federal and provincial level, on infrastructural development projects during the election year, strong private sector spending and better security and energy situation create encouraging prospects for another year of high GDP growth. However, to sustain the current growth momentum, the worsening twin deficits situation needs to be addressed through meaningful policy reforms. Any progress in the above direction should provide long-term confidence to market participants.

The local equity market currently trades at an earnings yield of 10%, offering nearly 400bp premium on short-term government paper. Corporate earnings growth is also anticipated to remain in double digits over the next two years. Notwithstanding short-term hiccups, we expect the equity market to deliver a superior return vis-à-vis other asset classes over a 1-year time horizon.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, Sukuks, and Islamic money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in Islamic Voluntary Pension Schemes (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 548.00% (KMI-30 Index: 370.04%) since inception. This translates to an average annualized return of 27.02% p.a. (KMI-30 Index: 21.90% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
