From the CIO's Desk

September turned out to be another dull month for the local bourse with the benchmark KSE-100 Index declining by 1.8% during the month. Manifesting low investor interest, average daily traded value plunged by 36%MoM as market participants chose to remain on the sidelines awaiting clarity on new government's macroeconomic policy agenda. Foreign investors continued with their selling spree, offloading shares worth USD58mn during the month. The above was mainly absorbed by insurance companies and mutual funds.

On the macroeconomic front, the current account deficit (CAD) for August saw a significant decline amounting to merely USD600mn. The above was a result of considerable decrease in imports (18.7%MoM) coupled with increase in remittances. If this trend continues, it will greatly allay investor concerns on country's balance of payments woes. The headline inflation continued to remain subdued, clocking at 5.1%YoY in September. However, core inflation, which excludes food and energy component, further increased to 8.0%YoY.

SBP in its latest monetary policy review meeting decided to raise its target policy rate by 100bps to 8.5%. The major reasons for the aggressive rate hike highlighted by SBP included concerns on rising inflation and persistent twin deficit situation along with increased pressures from global developments (high oil prices, capital outflow from EM, and trade war between US and China). Based on the surge in international oil prices, upward revision in domestic gas prices, rise in regulatory duties on imported items and lagged impact of currency devaluation, the SBP also revised up its projections of FY19 average inflation to 6.5-7.5% range.

In international developments, the US-China trade war further intensified with levy of tariffs on additional items by both sides. The US Federal Reserve raised its benchmark interest rate by 25bps to 2.25% projecting a sanguine outlook for the US economy. Escalating global trade tensions, rising US interest rates, a strong dollar and slowing economic growth is resulting in capital outflows from the emerging markets. Making matters worse, due to looming US sanctions on Iran, crude oil hit a multi-year high in September with Brent oil contracts now trading in mid-80s. The above, if sustained, will be negative for the domestic economy given Pakistan's significant reliance on imports to meet its energy needs.

Though, during the month, the government announced some policy measures such as hike in gas tariffs and amendments in the latest finance act, the market still awaits a comprehensive plan to address the burgeoning twin deficits issue threatening macroeconomic stability. Going forward, the market will take direction from developments on macros. First and foremost would be clarity on foreign flows in view of huge external financing requirements over the next 12 months. Key triggers would be 1) formal initiation of dialogue with IMF for a fresh support program 2) developments on other funding arrangements such as deferred oil payment facility, diaspora bonds, bilateral loans from China/Saudi Arabia etc. Further, Pakistan's entry into a fresh IMF program should provide credibility of a follow through on necessary structural reforms.

The KSE-100 index currently trades at an attractive forward earnings yield of 12.5%, offering nearly ~375bps premium over the short-term government paper even after the recent rate hike. Notwithstanding any short-term hiccups, we expect the equity market to deliver superior return vis-à-vis other asset classes over a 1-year time horizon.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have United Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 557.62% (KSE-100 Index: 299.15% since inception). This translates to an average annualized return of 25.13% p.a.(KSE-100 Index: 17.91% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

Analysis

- The headline inflation for the month clocked in at 5.1%YoY remaining subdued as recorded in a decline of 0.1% on a month-on-month basis. However, the core inflation which excludes food and energy items increased to 8.0%YoY. On observing the surge in international oil prices, upward revision in domestic gas prices, increase in regulatory duties on imported items and lagged impact of currency devaluation, the SBP has also revised its projections of average inflation to 6.5-7.5% range. We believe a further increase in oil prices may add to this pressure.
- The current account deficit (CAD) for Aug'18 saw a significant decline clocking to merely USD600mn. The above was a result of considerable decrease in imports (18.7%MoM) coupled with increase in remittances (5.5%YoY). Moreover, a positive contractionary development was witnessed among non-oil imports which can be seen as an early sign of recovery in the trade imbalance.
- The central bank in its Sept'18 monetary policy meeting decided to raise its target policy rate by 100bps to 8.5%, further reinforcing the consolidation efforts made in the previous 10 months. The major reasons highlighted by the SBP included concerns of rising inflation, persistent twin deficit situation along with increased pressures from global developments (high oil prices, capital outflow from EM, and trade war).
- Pakistan's FX position continued to remain fragile at USD 15.5bn. A likely entry into a fresh IMF program along with additional policy reforms to address macroeconomic deterioration are expected to allay pressure on Foreign Reserves position.
