Market Review & Outlook

Fund Managers Report - December'18

Managed by:
UBL Fund Managers Limited

From the CIO's Desk

The benchmark KSE-100 Index declined by 8.5%MoM in December, continuing on its downward trend from last month. The factors that lead to such dismal performance include deterioration of investor confidence due to low macroeconomic visibility especially on the external side, mushrooming political noise and a broad sell-off in international stock markets on fears of a global growth slowdown. The overall activity also remained dry as average volumes plunged by 22%MoM. Foreign selling continued (worth USD28.4mn) in line with global equities selloff. Sentiments were further affected by Fitch downgrading Pakistan from B to B-, highlighting higher credit risk. For the year 2018, the benchmark index closed 8.4% in the red, marking a second consecutive year of negative returns.

The current account deficit (CAD) for the month of November came in at USD1.3bn, taking cumulative 5MFY19 CAD down to USD6.0bn, an improvement of 11%YoY. We expect further improvement in external current account numbers in the coming months, driven by recent slump in International oil prices (down 9.5%MoM and 19.5% in CY18) along with expected decline in non-oil imports after currency adjustment. The CPI inflation clocked in at 6.2%YoY for December 2018, well below market expectations, whereas core inflation came in at 8.4%YoY. This trend was mainly account of lower food prices. Recent decline in international oil and other commodity prices has softened near term inflationary concerns.

Globally, weak economic outlook, given the trade war between US and China and fiscal issues in EU, US Fed future interest rate path and OPEC's oil supply cut decision remained the focus of investors' attention. Recent weakness in global commodity prices, especially crude oil, in the backdrop of global growth concerns is highly favorable for the domestic economy given Pakistan's significant reliance on oil imports to meet its energy needs and high energy-related fiscal subsidies. In the preceding year, strengthening US dollar on the back of increasing interest rates and robust growth in the US caused massive capital outflows from various emerging markets. However, in 2019 we expect emerging markets including Pakistan to see a major trend reversal with our view premised on slowing US growth and a relatively benign interest rate outlook in the US as well as other developed and emerging economies.

The macroeconomic challenges that current government faces requires a methodical and careful approach. A well thought out and decisive policy response would restore investors' confidence. The above, together with clarity on external funding arrangements such as inflows from China and Gulf and progress on a fresh IMF program, would act as a key trigger for the local bourse. Despite recent increase in fixed income yields, we still find tremendous value in the stock market for medium to long-term investors, as reflected in ~14% earning yield and strong double-digit earnings growth over the next two years, especially in the backdrop of peaking interest rates over the next few months.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, Sukuks, and Islamic money market instruments. It has the potential to earn returns well above those of Money Market Funds and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in Islamic Voluntary Pension Schemes (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 478.23% (KMI-30 Index: 293.33%) since inception. This translates to an average annualized return of 22.49% p.a. (KMI-30 Index: 17.15% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
