The benchmark KSE-100 Index, continuing on its upward trajectory from last month, posted a 6.5%MoM return in December 2020 taking CY20 return to 7.4%. Encouraging developments on Covid vaccines and improvement in macroeconomic indicators as manifested by an improved current account position, currency stabilization, rising forex exchange reserves and a rebound in large scale manufacturing acted as catalysts for the market. Moreover, ample domestic liquidity and subdued fixed income yields also supported the positive performance of the equity market during the outgoing month. Foreigners remained net sellers offloading shares amounting to USD96.3mn during the month. Among domestic investors, individuals, corporates and mutual funds were net buyers, mopping up shares worth USD32.5mn, USD57.2mn and USD11.1mn, respectively.

The headline inflation for December came down to 8.0%YoY from 8.3%YoY last month due to a significant decline in food item prices. In the aftermath of a long overdue contraction in food inflation, monthly inflation finally fell by 0.7% in December after a 7 month hiatus. We expect headline inflation to drop further in January due to high base effect and softer food prices. However, thereafter we expect resurgence in inflationary pressures on account of expected hike in utility tariffs, some additional revenue enhancement measures, uptick in commodity prices and reversal of base effect. For the current fiscal year, we expect inflation to remain in the range of 8.5-9.0%. We are of the view that SBP is likely to maintain status quo in the next monetary policy review meeting before altering its stance in the last quarter of the fiscal year.

Remarkable improvement has been observed in external current account position during FYTD. The current account posted a surplus for the fifth consecutive month in November. The surplus for the month came at USD447mn, taking 5MFY21 current account balance to USD+1.6bn compared to a deficit of USD 1.7bn in the same period last year. The above has been driven by a sustained increase in remittances and other current transfers and sizable fall in services imports. We expect some deterioration in current account position during 2HFY21 on rising imports and a relative slowdown in the remittances trend. For the full fiscal year, we anticipate current account balance to post a deficit of less than 1% of GDP. However, overall balance of payments position for FY21 should be comfortable due to an adequate surplus on financial account. □

On the fiscal front, FBR collected PKR 2.20tn during 1HFY21, slightly below target of PKR 2.21tn. During the second half of the fiscal year, FBR will have to collect nearly Rs2.77tn to meet full year target of 4.96tn. We find the aforesaid target quite difficult to achieve as it would require 45%YoY growth in tax collection in 2HFY21. We anticipate a sizable revenue collection shortfall in the coming months due to an ambitious revenue collection target for the fiscal year sans innovative budgetary measures to enhance revenues. We expect the government to overshoot its FY21 budget deficit target of 7% of GDP by 0.5-1% due to lower collection and higher expenditure despite decreasing local borrowing cost. □

From a fundamental perspective, despite the recent run-up, the equity market still holds a huge potential as corporate earnings are expected to witness a decent growth in CY21 and beyond. Earnings yield differential from 10Y PIB yield is 3.2% (13.2% vs. 10.0%) which is still much higher than the average yield difference of 1.1% over the last 15 years.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have UBL Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 644.30% (KSE100 Index: 325.99% since inception). This translates to an average annualized return of 20.73% p.a. (KSE-100 Index: 14.57% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

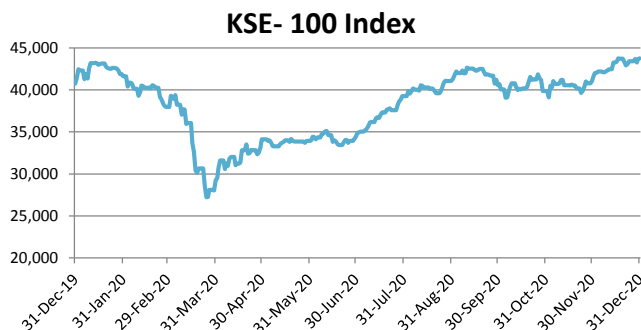

Money Market Review & Outlook

The headline inflation for December came in at 8.0%YoY. The dip in inflation was mainly driven by lower food prices (35% weight) owing to high base effect.

We expect policy rate to remain at current level in the upcoming MPS meeting, as 7.0% is appropriate to support domestic economic activities and maintain financial stability. On the external front, current account sustained its robust position for the fifth consecutive month, recording a surplus of USD 447mn in November, taking 5MFY21 surplus to USD 1,640mn against deficit of USD 1,740mn in SPLY. The aforesaid notable FYTD performance was brought about primarily by growth in worker remittances and rise in other current transfers. For FY21, we expect current account deficit to be around 1% of GDP.

Equity Market Review & Outlook

Continuing on the performance from last month, KSE-100 index posted a 6.54% MoM return in Dec '20. The drop in corona virus cases and improvement in macro-economic indicators demonstrated by an improved current account position, currency stabilization and rising forex reserves acted as catalysts for the market. Sufficient liquidity and declining fixed income yields also supported the positive performance of the equity market during the outgoing month. Foreigners remained net sellers offloading shares amounting to USD96.3mn during the month. Among domestic investors, individuals, corporates and Mutual Funds were net buyers, mopping up shares worth USD32.5mn, USD57.2mn and USD11.1mn, respectively. Besides a lower inflation reading for the month, healthy economic indicators (positive current account surplus and growing worker remittances) also reinforced the market's positive momentum.

We hold an optimistic view on equities on the back of major developments on the Covid19 vaccine, encouraging domestic economic indicators and attractive valuations especially for blue chip companies. Compared to fixed income avenues, market's current yield differential from 10Y PIB yield is 3.17% (13.15% vs 9.98%) which is still much higher than the average yield difference of 1.1% over the last 15 years. Moreover, there is ample liquidity available that we think may enter in equity market due to waning investor interest in alternative avenues, thus signifying a strong performance expectation of the asset class.

UBL Money Market Fund

Fund Managers Report - December 2020

Investment Objective

The objective of UBL Money Market Fund is to generate competitive returns within a low risk portfolio to provide a regular stream of income and easy liquidity to its investors by investing a major chunk of the portfolio in short term government securities.

Historical Performance

Disclosure as per SECP's SCD Circular No. 16, 2014
Fund Managers Report

The periodic returns for the funds have been presented below as per SECP's SCD Circular No. 16 dated July 03, 2014. The returns presented below are:

- Yearly returns for the last five fiscal years, and
- Absolute returns for every fiscal year since inception

The returns have been annualized for money market, income and aggressive income schemes where the performance evaluation period is less than one year.

Last 3 & 5 Fiscal Years
