# Market Review & Outlook

Fund Managers Report - February'20

Managed by:  
UBL Fund Managers Limited

## From the CIO's Desk

After showing strong positive momentum during the last few months, the stock market finally succumbed to a host of negative news in February with the benchmark KSE-100 Index losing 3650 points (8.7%) to close the month at 37,983 points. The major catalysts that weighed on the market included: 1) inflation reading for January overshooting the street consensus, 2) FATF decision to keep Pakistan in the grey list until the next review in June 3) delays in conclusion of staff level agreement with IMF and 4) rising jitters from coronavirus panicking both local and foreign investors. The overall trading activity also took a breather with overall trading value and volume declining by 30% and 32%MoM, respectively.

The January headline inflation of 14.6% came significantly above market expectations due to considerable hike in some food item prices and higher house rent reading. This raised concerns that monetary easing could be delayed beyond CY20. The above was also manifested in rising fixed income yields during the month. However, retail inflation for February came out at 12.4%, much below consensus estimates. The primary reason for the softer reading was drop in food inflation and reduction in energy prices. The recent sharp reduction in international commodity prices along with government efforts to address supply constraints should translate into softer inflation reading for the current month creating plausible room for a rate cut (25-50bps) in the upcoming MPS.

The external account position continues to remain benign as reflected in FYTD healthy foreign exchange reserves accumulation. The 7MFY20 current account deficit shrank by 72% from USD 9.4bn during SPLY to USD 2.6bn mainly due to hefty decline in trade deficit by 37% YoY. While the overall balance of payments position posted a surplus of USD5.2bn on account of healthy financial flows. Going forward, we see the FY20 balance of payments position to remain strong due to contained current account deficit and adequate flows in financial account. Moreover, IMF and Pakistan have also subsequently reached a staff level agreement on second review allowing Pakistan to receive the third tranche (\$450bn) in early April.

On the fiscal side, thanks to abnormal growth in non-tax revenues which made up for the shortfall in tax revenues, the government managed to reduce its 1HFY20 budget deficit to 2.3% of GDP compared to 2.7% during SPLY. All quantitative performance targets of IMF were also met. Notwithstanding the above improvement largely due to one-offs, sustained improvement on the fiscal side would require deep structural reforms with main issues being a large undocumented economy, skewed distribution of resources/responsibilities among federating units and a bloated public sector.

We hold a sanguine view on domestic equity market in view of attractive valuations and expected double-digit corporate earnings growth over the next two years. Further, earnings yields differential from 10Y PIB yield is over 4% (14.9% vs 10.8%) which is much higher than the average yield differential of 0.7% over the last 10 years. At current levels, the market is trading at a low PE of 6.7x against historical average of ~8.0x leaving ample room for rerating.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 500.54% (KMI-30 Index: 282.14% since inception). This translates to an average annualized return of 20.04% p.a. (KMI-30 Index: 14.63% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
