From the CIO's Desk

The local bourse depicted a flattish trend in June with the benchmark KSE 100 Index inching up by just 1.5% during the month. Uncertainty surrounding Covid-19 and incessant foreign selling overshadowed positive triggers in the form of i) an unannounced 100bps cut in policy rate, 2) significant external financial inflows to shore up foreign exchange reserves, 3) a current account surplus in May & 4) a benign and routine FY21 budget. During the month, foreign investors sold shares worth USD46mn, bringing the net outflow for FY20 to USD285mn. During the last five years, foreign investors have been consistently selling Pakistani equities with cumulative net outflows adding up to a staggering USD1.85bn. However, the market still managed to eke out 1.5% gain in FY20 in contrast to heavy losses witnessed in the last two fiscal years (FY19 and FY18).

The headline inflation for June came in at 8.6% taking FY20 average inflation to 10.8% against 6.8% in FY19. The uptick in FY20 inflation was brought about by higher food prices, partly due to supply and administrative issues, while non-food inflation remained relatively controlled owing to lower fuel prices, subdued increase in house rents and weak domestic demand. We expect headline inflation numbers to remain muted during the next 6-7 months on account of subdued commodity prices, gradual and back-loaded increase in utility tariffs, few new taxation measures in the budget and high base effect of last year. In view of subdued inflation outlook, a manageable external account position and weak domestic economic activity, SBP further cut its policy rate by 100bp to 7.0% in an unscheduled monetary policy review meeting during the month. We think the current easing cycle is nearing an end as risks to growth, inflation and macroeconomic stability look more balanced now. A normalizing yield curve corroborates our view.

On the external front, current account posted a surplus of USD13mn in May 2020 relative to a deficit of USD1.0bn in May 2019 and USD572mn in the preceding month. The above was mainly driven by 36%YoY decline in imports and a hefty 88%YoY fall in services deficit. However, partly offsetting the above, exports and remittances also declined by 45%YoY and 19%YoY, respectively. Going forward, we expect current account deficit to remain contained as subdued commodity prices and services imports neutralize the impact of lower exports and remittances. Further, planned inflows along with deferment of debt repayments should allow the government to achieve external sector stability over the next 12 months.

On the fiscal side, we expect FY20 to close with a deficit of 9-10% on account of weak collections & higher expenditure in 4QFY20 due to covid19 related developments. For FY21, the government is targeting a fiscal deficit of ~7% of GDP. However, we expect the government to overshoot the aforementioned number by 1-2% on account of lower collections & higher expenditure despite decreasing local borrowing cost.

Going forward, with recent rate cuts, we believe the focus of central bank has shifted toward economic growth and employment which should keep equities in the limelight. From valuation perspective, we hold a sanguine view on equities as despite markdowns in earnings due to Covid-19, earnings yield differential from 10Y PIB yield is over 4.9% (13.5% vs. 8.4%), much higher than the average yield differential of 0.7% over the last 10 years. At current levels, the market is trading at an undemanding P/B of 0.9x vs. historical average of 1.8x, leaving further room for rerating. Furthermore, a dovish monetary policy where real rates are close to zero on a forward looking basis makes equity valuations more attractive.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have UBL Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 487.40% (KSE-100 Index: 235.12% since inception). This translates to an average annualized return of 19.06% p.a. (KSE-100 Index: 12.65% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

| 20 Years | 100 | 10.51% | 0.00% |
| Total | 114,944 | | |

Analysis

- The headline inflation for June came in at 8.59% vs. 8.23% last month. This took the FY20 average inflation to 10.77% against 6.80% in FY19. Sequential uptick in inflation was mainly on account of Food inflation (+2.1% MoM), Clothing & Footwear index (+0.8% MoM) & and Miscellaneous (+0.8% MoM). However decline in petroleum product prices during the month kept a lid on inflation.
- On the external front, a positive CAD of USD13mn during May'20 was a refreshing surprise relative to a deficit of USD1,004mn in May'19 & USD572mn in the preceding month (Apr'20). The primary reason for a surplus was a significant decline in imports of 36% YoY (down USD 1,578mn) along with hefty decline in services deficit by 88% YoY. However, exports and remittances also declined by 45% YoY (USD 1,051mn) and 19% YoY (USD 429mn), respectively.
- SBP further cut its policy rate by 100bp to 7.0% in an unscheduled monetary policy review meeting during the month. We think the current easing cycle is nearing an end as risks to growth, inflation and macroeconomic stability look more balanced now.

Equity Market Review & Outlook

Performance of Stock Market Indexes and Stock Funds managed by UBL Funds

| | FYTD | CYTD |
|---------------|------|--------|
| KSE-100 Index | 0.1% | -16.7% |
| USF | 3.5% | -14.1% |
| KMI-30 Index | 1.9% | -16.4% |
| ASSF | 9.8% | -10.7% |

Analysis

- The benchmark index had a dull outing in Jun-20 inching up 1.5%, closing the fiscal year flat (+1.5%). Uncertainty surrounding Covid-19 overshadowed positive triggers in the form of i) an unannounced 100bps cut in policy rate, 2) significant external inflows to shore up our reserves, 3) a current account surplus in May & 4) lack of new taxes albeit a precarious fiscal situation.
- Overall trading activity showed some respite with volumes & traded value declining 15%/12% MoM respectively. Foreigners continued to remain net sellers offloading shares worth USD45.7mn
- From valuation perspective, we hold our sanguine view on equities as despite markdowns in earnings due to Covid-19 earnings yield differential from 10Y PIB yield is over 4.9% (13.5% vs 8.4%), much higher than the average yield differential of 0.7% over the last 10 years. At current levels, the market is trading at an undemanding P/B of 0.9x vs. historical average of 1.8x leaving further room for rerating, offering attractive dividend yields of 6.4% much higher compared to regional average of ~2.7%.

UBL Money Market Fund
