Debt Market Review

Debt Market Review

During the first quarter of FY26, investor interest in Treasury bills remained robust. Total participation in T-bill auctions surged to PKR 9.37 trillion, with the government managing to raise approximately PKR 3.54 trillion—exceeding the target of PKR 2.97 trillion.

Notably, the 1-month T-bill attracted the highest interest, accounting for 41% of total bids. Demand also tilted toward the 12-month tenor, which comprised around 31% of overall participation. The 3-month and 6-month T-bills accumulated 15% and 13% of the total bids, respectively.

In terms of accepted bids, the government raised PKR 521 billion through 1-month papers, PKR 1.31 trillion via 3-months, PKR 500 billion in 6-months, and PKR 1.2 trillion in 12-month T-bills.

Fixed-rate Pakistan Investment Bonds (PIBs) continued to attract consistent investor interest during the quarter, with total bids (face value) reaching PKR 5 trillion—largely driven by expectations of a potential monetary policy easing.

Despite the strong appetite, the government adopted a cautious stance, accepting PKR 1.1 trillion in realized value (including non-competitive bids), closely in line with the auction target of PKR 1 trillion.

The accepted amount was distributed across various tenors: PKR 90 billion in 2-year zero-coupon PIBs, PKR 95 billion in 3-year, PKR 407 billion in 5-year, PKR 419 billion in 10-year, and PKR 102 billion in 15-year zero-coupon bonds.

On the floating-rate side, significant participation was observed, despite the fact that the Ministry is only issuing 10-year tenors. Total participation surged to PKR 3.7 trillion—well above the cumulative target of PKR 0.9 trillion. The government accepted PKR 557 billion in bids, with an average spread of approximately 85 basis points during the quarter.

In the Islamic segment, investor interest leaned heavily toward variable-rate Ijara Sukuk—particularly the 10-year tenor, which accounted for 71% of the total bids. Overall participation in these auctions reached PKR 767 billion, while the government accepted only PKR 76.5 billion in the 10-year tenor, against a target of PKR 225 billion. All bids for the 5-year tenor were rejected.

Fixed-rate Ijara Sukuk also attracted considerable attention, drawing bids worth PKR 1.34 trillion. However, the government remained selective, accepting PKR 404 billion (realized value) against a target of PKR 375 billion. This included PKR 117 billion in 3-year, PKR 94 billion in 5-year, and a modest PKR 33 billion in 10-year discounted Ijara Sukuk. Additionally, a significant PKR 160 billion was raised through the 1-year discounted Ijara Sukuk.

Outlook

Looking ahead, inflation is expected to hover around ~7% in FY26, reflecting normalization of base effects and possible adjustments in utility tariffs, while external balances are likely to benefit from sustained remittances and restrained import demand. However, downside risks stem from geopolitical tensions, particularly the regional conflict and evolving global trade tariffs, alongside domestic vulnerabilities such as fiscal rigidities. During October authorities of IMF & Pakistan reached staff level agreement on the second review under Pakistan extended fund facility and the first review of Resilience and sustainability facility which shall continue reforms and will be pivotal for sustaining stability and gradually steering the economy towards higher growth.

Future Outlook

Looking ahead, inflation is expected to hover around ~7% in FY26, reflecting normalization of base effects and possible adjustments in utility tariffs, while external balances are likely to benefit from sustained remittances and restrained import demand. However, downside risks stem from geopolitical tensions, particularly the regional conflict and evolving global trade tariffs, alongside domestic vulnerabilities such as fiscal rigidities. During October authorities of IMF & Pakistan reached staff level agreement on the second review under Pakistan extended fund facility and the first review of Resilience and sustainability facility which shall continue reforms and will be pivotal for sustaining stability and gradually steering the economy towards higher growth.

5.1.2

The Finance Act, 2015 has brought amendments in the Income Tax Ordinance, 2001 whereby the bonus shares received by the shareholder are to be treated as income and a tax at the rate of 5 percent is to be applied on value of bonus shares determined on the basis of day end price on the first day of closure of books. The tax is to be collected at source by the company declaring bonus shares which shall be considered as final discharge of tax liability on such income. The Management Company of the Fund jointly with other asset management companies and Mutual Funds Association of Pakistan, has filed a petition in Honorable Sindh High Court to declare the amendments brought in Income Tax Ordinance, 2001 with reference to tax on bonus shares for collective investment schemes as null and void and not applicable on the mutual funds based on the premise of exemptions available to mutual funds under clause 99 of Part I and clause 47B of Part IV of Second Schedule to the Income Tax Ordinance, 2001. The Honorable Sindh High Court has granted stay order till the final outcome of the case. Certain investee companies of the Fund, in pursuance of the aforesaid amendment, withheld shares equivalent to 5% of bonus entitlement of the Fund having fair market value of Rs.669,095 at March 31, 2020. Such shares have not been deposited by the investee company in CDC account in Income Tax department. The Fund has included the shares withheld in its investments and recorded them at fair market value at year end. Furthermore, the Finance Act 2018 has brought an amendment in the Income Tax Ordinance 2001, whereby the 5% withholding tax on bonus shares has been withdrawn. Therefore, the bonus shares received during the period ended 31 March 2020, are not liable to withholding of Income Tax.

16 FAIR VALUE MEASUREMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

16.1 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at the reporting date, the Fund held the following financial instruments measured at fair value:
