Economic Review and Outlook – FY25

The country largely preserved the macro-stability gains achieved in FY25 through 1QFY26, even as headline inflation rebounded late in the quarter, CPI peaked to 5.6% in September on flood-related food supply pressures and increase in wheat prices. In this context, the SBP maintained the policy rate at 11.0% in both the July 30 and September MPC meetings, emphasizing positive real rates alongside near-term risks from food, energy and the external environment.

On the external account, the balance shifted to modest monthly current-account deficits as imports normalized, the CA deficit in the month of July clocked around USD ~379mn and USD ~245mn in August, taking 2MFY26 CAD to ~USD 624mn. Exports and remittances remained resilient on a YoY basis in the two-month period, while SBP FX reserves hovered around USD ~14.3–14.4bn into late September. The rupee during the said period remained broadly stable.

On reforms and sovereign risk, S&P upgraded Pakistan to B- (from CCC+) in the month of July, followed by Moody's one-notch upgrade to Caa1 (Stable) in August, reflecting progress under the IMF program and improved external buffers. Domestically, authorities finalized a ~PKR 1.25trn circular-debt resolution framework for the power sector in September which is an important structural step toward energy-sector sustainability.

While growth momentum remains gradual, high-frequency indicators continue to improve, the demand recovery is visible in key sectors such as automobiles, cement, and fertilizers on a YoY basis as compared to corresponding period last year despite flood impact.

Stock Market Review

The domestic equity market delivered three consecutive up months, taking the benchmark KSE 100 to fresh highs by quarter end with cumulative increase of 39,866 points or 32% reaching an all-time high of 165,493 points. The upbeat rally was majorly driven by Banking, cements and Fertilizer sector contributing 14,418pts, 4,613pts and 3,820pts respectively. Domestic institutional investors such as Mutual funds and Individual investors were net buyers of USD 206 mn and USD 89 mn, respectively. However, Foreigners and Banks continued to sell local equities, offloading shares amounting to USD126 and USD 150mn during 1QFY26.

Debt Market Review

Debt Market Review

During the first quarter of FY26, investor interest in Treasury bills remained robust. Total participation in T-bill auctions surged to PKR 9.37 trillion, with the government managing to raise approximately PKR 3.54 trillion—exceeding the target of PKR 2.97 trillion.

Notably, the 1-month T-bill attracted the highest interest, accounting for 41% of total bids. Demand also tilted toward the 12-month tenor, which comprised around 31% of overall participation. The 3-month and 6-month T-bills accumulated 15% and 13% of the total bids, respectively.

In terms of accepted bids, the government raised PKR 521 billion through 1-month papers, PKR 1.31 trillion via 3-months, PKR 500 billion in 6-months, and PKR 1.2 trillion in 12-month T-bills.

Fixed-rate Pakistan Investment Bonds (PIBs) continued to attract consistent investor interest during the quarter, with total bids (face value) reaching PKR 5 trillion—largely driven by expectations of a potential monetary policy easing.

Despite the strong appetite, the government adopted a cautious stance, accepting PKR 1.1 trillion in realized value (including non-competitive bids), closely in line with the auction target of PKR 1 trillion.

The accepted amount was distributed across various tenors: PKR 90 billion in 2-year zero-coupon PIBs, PKR 95 billion in 3-year, PKR 407 billion in 5-year, PKR 419 billion in 10-year, and PKR 102 billion in 15-year zero-coupon bonds.

On the floating-rate side, significant participation was observed, despite the fact that the Ministry is only issuing 10-year tenors. Total participation surged to PKR 3.7 trillion—well above the cumulative target of PKR 0.9 trillion. The government accepted PKR 557 billion in bids, with an average spread of approximately 85 basis points during the quarter.

In the Islamic segment, investor interest leaned heavily toward variable-rate Ijara Sukuk—particularly the 10-year tenor, which accounted for 71% of the total bids. Overall participation in these auctions reached PKR 767 billion, while the government accepted only PKR 76.5 billion in the 10-year tenor, against a target of PKR 225 billion. All bids for the 5-year tenor were rejected.

Fixed-rate Ijara Sukuk also attracted considerable attention, drawing bids worth PKR 1.34 trillion. However, the government remained selective, accepting PKR 404 billion (realized value) against a target of PKR 375 billion. This included PKR 117 billion in 3-year, PKR 94 billion in 5-year, and a modest PKR 33 billion in 10-year discounted Ijara Sukuk. Additionally, a significant PKR 160 billion was raised through the 1-year discounted Ijara Sukuk.

Yield Curve comparison is given below:

Outlook

Looking ahead, inflation is expected to hover around ~7% in FY26, reflecting normalization of base effects and possible adjustments in utility tariffs, while external balances are likely to benefit from sustained remittances and restrained import demand. However, downside risks stem from geopolitical tensions, particularly the regional conflict and evolving global trade tariffs, alongside domestic vulnerabilities such as fiscal rigidities. During October authorities of IMF & Pakistan reached staff level agreement on the second review under Pakistan extended fund facility and the first review of Resilience and sustainability facility which shall continue reforms and will be pivotal for sustaining stability and gradually steering the economy towards higher growth.

Future Outlook

Looking ahead, inflation is expected to hover around ~7% in FY26, reflecting normalization of base effects and possible adjustments in utility tariffs, while external balances are likely to benefit from sustained remittances and restrained import demand. However, downside risks stem from geopolitical tensions, particularly the regional conflict and evolving global trade tariffs, alongside domestic vulnerabilities such as fiscal rigidities. During October authorities of IMF & Pakistan reached staff level agreement on the second review under Pakistan extended fund facility and the first review of Resilience and sustainability facility which shall continue reforms and will be pivotal for sustaining stability and gradually steering the economy towards higher growth.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

15.1 FAIR VALUE HIERARCHY

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at the reporting date, the Fund held the following financial instruments measured at fair value:

As at reporting date, the Fund does not hold any financial instruments which are measured at fair value. The estimated fair value of all financial assets and liabilities at amortised cost is considered not significantly different from the carrying value as the items are short-term in nature.
