Market Review & Outlook

From the CIO's Desk

Fund Managers Report - May 2021

After witnessing lackluster performance during preceding three months, the local equity market came back with a strong recovery in May with the benchmark KSE-100 Index increasing by 8.2%MoM. The aforesaid robust monthly gains were driven by 1) improving macroeconomic indicators (above-expected GDP growth, higher remittances flows and benign external account position) 2) noticeable decline in Covid-19 cases from peak of 6,000 to below 2,000 cases and 3) improving political situation (cracks in PDM opposition alliance and peaceful end to TLP protests). Besides, encouraging news flow on the upcoming FY22 federal budget also reinforced the positive momentum and investors' confidence. Depicting rising investor interest, market activity also improved with traded value and volumes increasing by 21.3%/58.9MoM, respectively. Foreigners remained net sellers offloading shares amounting to USD43.4mn during the month. Among domestic investors, individuals and other organization remained net buyers, mopping up shares worth USD26.1mn and USD17.1mn, respectively.

The headline inflation for May came in at 10.87%YoY and 0.10%MoM, taking the 11MFY21 CPI reading to 8.83% as compared to 8.22% in SPLY. The well controlled monthly inflation of just 0.10% vs 1.03% in the previous month was primarily led by 8.1%MoM decrease in perishable food index with items such as tomatoes, onions, fresh vegetables, eggs and pulses contributing the most to the monthly decline. Moreover, housing and transport inflation also receded during the outgoing month because of 5.61%MoM lower electricity fuel price adjustment and absence of any hike in petroleum product prices. For the current fiscal year, we expect average inflation to remain in the range of 8.9-9.0%.

In line with expectations, SBP has opted for status quo, maintaining the policy rate at 7.0% in the recent MPC meeting, citing that current accommodative monetary policy stance is well appropriate in supporting ongoing economic recovery, despite decent economic recovery there is still some idle capacity following last year contraction, second-round effects from the supply shocks are also not clearly apparent and inflation expectations are well anchored. However, the monetary policy committee has also highlighted that if demand side pressures appear as the recovery becomes more durable and the output reaches at maximum capacity, it would be prudent for monetary policy to begin to normalize through a gradual drop in the degree of accommodation. We expect 150-200bps policy rate increase in the ongoing economic upcycle.

On the external front, Pakistan posted current account deficit of USD 200mn in May as compared to deficit of USD 33mn in the previous month. For FYTD, the current account remained in surplus of USD 773mn vs deficit of USD 4,657mn in SPLY, mainly due to 29%/96% increase in remittances/other current transfers and 53% decline in services deficit. For full fiscal year, we project current account to remain in the range of +0.2% to -0.2% of GDP. The overall balance of payments position should also stay comfortable where we expect FX reserves accretion of USD 4-5bn in FY21 on account of contained current account deficit and strong inflows under financial account.

As per provisional fiscal numbers, FBR collected PKR 4.16 trillion (+17%YoY) during 11MFY21, exceeding the target of PKR 3.99trillion. We think that FBR will manage to collect PKR4.7trn (revised target) during the ongoing fiscal year. The overall FY21 fiscal deficit is expected to come at 7.0%-7.5% of GDP. Further, as per the latest new flow, FBR revenue collection target for FY22 budget is likely to be PKR 5.8 trillion as compared to target (revised) of PKR 4.7 trillion set for ongoing fiscal year. Moreover, this upcoming budget is also expected to be growth oriented and business friendly, providing incentives and facilities to various sectors, within what is allowed under IMF loan conditions.

We reiterate our sanguine view on equity market as compared to alternative avenues, as market's current earnings yield differential with 10Y PIB yield is 4.18% (14.08% vs. 9.90%) which is much higher than the average yield gap of 1.1% over the last 15 years. Further, earnings growth is also expected to remain robust during the next 12 months. Due to their undemanding valuations, large cap stocks in the banking, oil exploration, fertilizer and power sector could drive the next leg of stock market performance in our opinion.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have UBL Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 707.85% (KSE100 Index: 366.30% since inception). This translates to an average annualized return of 20.77% p.a. (KSE-100 Index: 14.92% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

Money Market Review & Outlook

Yield Curve

The headline inflation for May came in at 10.87%YoY and 0.1%MoM, taking the 11MFY21 CPI reading to 8.83% as compared to 8.22% in SPLY. The well controlled monthly inflation 0.1%MoM vs 1.03% in previous month was primarily led by 8.1%MoM decrease in perishable food index with items such as Tomatoes, Onions, Fresh Vegetables, Eggs and Pulses contributing the most to the monthly food inflation decline. Moreover, housing and transport inflation also receded during the outgoing month on the back 5.61%MoM lower electricity fuel price adjustment and absence of any hike in petroleum product prices. We think inflation to remain elevated in the upcoming month on account of uptick in international crude and other commodity prices. For the current fiscal year, we expect average inflation to remain in the range of 8.9-9.0%.

In line with earlier expectations, the SBP authorities opted for status quo maintaining the policy rate at 7.0% in the recent MPC meeting citing that current accommodative monetary policy stance is well appropriate in supporting ongoing economic recovery, despite decent economic recovery there is still some idle capacity following last year contraction, second-round effects from the supply shocks are also not clearly apparent and inflation expectations are well anchored. We expect 150-200bps policy rate increase in the ongoing economic cycle.

On the external front, Pakistan posted a current account deficit of USD 47mn in March as compared to deficit of USD 31mn in previous month, the monthly rise in CAD mainly driven by 13%MoM rise in total imports. However, exports and worker remittances witnessed an encouraging growth of 19.3%MoM and 20.3%MoM, respectively. For FYTD, the current account remained in surplus of USD 959mn vs deficit of USD 4,147mn in SPLY, mainly due to 26.2%/96.0% increase in remittances/other current transfers and 52.3% decline in services deficit.

On external front, Pakistan posted current account deficit of USD 200mn as compared to deficit of USD 33mn in previous month. The rise in monthly CAD number is mainly due to 11% MoM (USD 353mn) decline in total exports. Notwithstanding the above CAD, FYTD, the current account remained in surplus of USD 773mn vs deficit of USD 4,657mn in SPLY, mainly due to 29%/96% increase in remittances/other current transfers and 53% decline in services deficit. For full fiscal year, we project current account to remain in the range of +0.25% to -0.25% of GDP. The overall balance of payment position should also stay comfortable where we expect FX reserves accretion of USD 4-5bn in FY21 on account of contained current account deficit and strong inflows under financial account.

Equity Market Review & Outlook

KSE- 100 Index

After witnessing lackluster performance during preceding three sessions, the local equity market comeback with a strong recovery in the May with the benchmark KSE-100 index increasing by 8.2%MoM. The market headed north was mainly led by two main factors 1) robust macro-economic indicators (above expectation GDP growth, higher remittances flows and positive current account balance) and 2) noticeable decline in Covid-19 cases from peak of 6,000 to below 2,000 cases. Besides, positive news flow on the upcoming FY22 federal budget also reinforced the positive momentum and investors' confidence.

Foreigners remained net sellers offloading shares amounting to USD43.4mn during the month. Among domestic investors, individuals and other organization remained net buyers, mopping up shares worth USD26.1mn and USD17.1mn, respectively.

From fundamental standpoint, we hold our sanguine view on equity market as corporate earnings are expected to witness a decent growth in CY21 and beyond along with the encouraging macro-economic indicators. Also, the earnings yield differential from 10Y PIB yield is still 4.18% (14.08% vs. 9.90%), which is still much higher than the average yield difference of 1.1% over the last 15 years.
