Market Review & Outlook

From the CIO's Desk

Fund Managers Report - November 2021

The local equity market index continued to experience volatility during Nov-21 as the benchmark KSE-100 shed 1,112pts (-2.4%) on account of i) aggressive monetary tightening (150bp hike in policy rate coupled with 1% increase in cash reserve requirement), ii) persistent PKR devaluation against USD and iii) MSCI related rebalancing. Foreigners offloaded USD 141.3mn worth of equities during the month. Among domestic investors, Companies/Insurance/Individuals/Mutual Funds remained net buyers, mopping up shares worth USD49.2/ 29.6/ 26.9/ 16.04mn respectively. Softening of international commodity prices amid emergence of the Omicron variant, subsiding uncertainty relating to the IMF and completion of MSCI re-balancing could provide support to the market in Dec-21. However, the pace of monetary adjustments would be key going forward.

The headline inflation for November arrived at 11.53% Y/Y and 2.98% M/M (significantly higher than consensus estimates), taking 5MFY22 average inflation to 9.32% YoY on account of broad based rise in prices with food inflation leading the overall increase in inflation. The monthly jump in inflation was mainly due to a sharp increase in tomatoes, fresh vegetables and vegetable ghee. Moreover, an uptick in electricity charges by 8.3% M/M and motor fuel price by 8.4% M/M also kept the housing and transport group elevated (up 2.41% M/M and 6.31% M/M).

In its recent meeting, the monetary policy committee decided to increase the policy rate by 150bp (above market consensus of 50-100bp) to 8.75%. The stance supports sustaining growth in view of rising risks to inflation and balance of payments. We expect another 50-100bp rise in the upcoming monetary policy meeting.

The external current account for the month of Oct-21 posted a deficit of USD1,663mn as compared to a surplus of USD448mn in SPLY primarily on the back of a 66% Y/Y jump in imports. On an aggregate basis, the country's current account recorded a deficit of USD5.1bn during 4MFY22 against a surplus of USD1.3bn during 4MFY21 due to notably high trade deficit of goods. Pakistan's goods import bill rose by 66% YoY to USD23.4bn in 4MFY22 (4MFY21: USD14.1bn) both due to higher global prices and strong domestic demand. Services deficit also widened due to rising transportation, travel and IT imports. Going forward, softening commodity prices could provide some relief in the short term, however, we expect current account weakness to persist due to higher deficit on goods, services and income accounts. Based on our estimates, current account deficit should breach the upper bound of SBP stated target of 3.0% (of GDP) by a wide margin in FY22.

On the fiscal front, FBR collected PKR470bn against the target of PKR408bn. This represents an increase of 35% as compared to Nov-20. On an aggregate basis, net collections amount to PKR2,341bn during 5MFY22, 37% Y/Y above PKR1,695bn in SPLY. Looking ahead, increasing PDL by PKR4.0/litre on a monthly basis would supplement the overall PDL collection. We await details of the renegotiated IMF staff agreement to update our fiscal outlook for the current year. For now, we expect the government to overshoot its FY22 budget deficit target of 6.3% of GDP on account of lower than target collection of non tax revenue and provincial surplus.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our UBL Asset Allocation Fund (UAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those, with higher risk tolerance and return expectations, we have UBL Stock Advantage Fund which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (UBL Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 718.52% (KSE100 Index: 338.81% since inception). This translates to an average annualized return of 19.93% p.a. (KSE-100 Index: 13.64% p.a.) - thus outperforming the KSE-100 Index by a significant margin.
