Economic & Stock Market Review

The country continued to reel from the impacts of the tensions in the middle east in the first quarter of FY27. The tensions which resumed in the early part of Jul'26 after short period of cease fire, refused to subside for the remainder of the quarter. The benchmark KSE100 index as result, corrected by 5.7% QoQ to close at 169,969 points and average trading volumes declined by 12.0% QoQ to 306mn, the lowest since 4QFY25 (253mn shares). Barring the only major positive contribution which came from the refinery sector that rallied on the back of the signing much awaited brownfield refinery policy, all other major sectors contributed negatively to the index. On the local portfolio investment side, mutual funds and banks were the major sellers whereas, individuals and companies were on the buying side.

On the macro-economic front, Consumer Price Index (Inflation) averaged at 10.2% YoY in 1QFY27, marking the second consecutive double digit quarterly average inflation (11.2% in 4QFY26). The increase is primarily attributed to utilities and transport groups due to the increase in electricity and petroleum products' prices, in the wake of higher oil and commodity prices. Food inflation also inched up to 10.3% YoY in 1QFY27 as opposed to 8.7% in the preceding quarter. The increase in food group prices is majorly driven by the sharp increase in wheat price, which faces a potential risk of shortage this season. As a result, average wheat price surged by ~17% QoQ to PKR 4,894/maund. On the fiscal side, the Federal Board of Revenue managed to collect PKR 3.08trn in the first quarter of FY27, thereby marginally exceeding the quarterly target by PKR 30bn, translating into a year-over-year growth of ~6.7%.

On the external side, the external account has remained largely contained during the first two months of FY27, with the current account deficit declining by 36.3% YoY to USD 543mn, despite an 18.8% YoY increase in the trade deficit to USD 6.2bn. The improvement has been supported by stronger foreign workers' remittances, which grew by 14.7% YoY to USD 7.3bn during 2MFY27. The import bill witnessed a broad-based increase and went up by 11.3% YoY in 2MFY27 on the back of higher commodity prices and other import charges (freight, premiums etc.).

Pakistan also witnessed credit rating upgrades during the quarter. Moody's, in Aug'26, upgraded Pakistan's sovereign credit rating to B3 from Caa1 and maintained a stable outlook, citing expectations of improvements in governance and easing external and fiscal vulnerabilities. This follows the rating upgrade

to 'B' from 'B-', by the S&P Global in Jul'26. As a result, the government was able to raise USD 3bn through a dual-tranche Eurobond in Sep'26. The transaction attracted nearly double the amount raised, reflecting strong investors' confidence.

Foreign exchange reserves held by the SBP inched up by ~USD 3.0bn to USD 21.4bn, following the receipt of the Eurobond tranche, thereby reaching to its highest level in the reported history. Furthermore, the Kingdom of Saudi Arabia (KSA) rolled-over USD 5bn deposits held with Pakistan for three years, moving away from its practice of annual roll-overs. This development reduces Pakistan's external debt repayments significantly and helps in mitigating roll-over risk.

Debt Market Review

During the first quarter of FY27, the debt market remained volatile due to changing monetary policy expectations and geopolitical developments. The State Bank of Pakistan (SBP) maintained the policy rate throughout the quarter. However, rising geopolitical tensions and inflationary concerns affected market sentiment and increased expectations of a possible tightening in monetary policy. As a result, yields remained under upward pressure, with market uncertainty likely to continue until geopolitical conditions stabilize.

Investor participation in Treasury Bill (T-Bill) auctions remained strong during the quarter, with total bids amounting to PKR 16.717 trillion (realized value). Against this, the government raised PKR 5.715 trillion, including non-competitive bids.

Investor demand was mainly concentrated in the 1-month tenor, which accounted for 40% of total bids. The 3-month, 6-month, and 12-month tenors accounted for 23%, 14%, and 23%, respectively.

Of the total amount raised, PKR 685 billion was accepted through 1-month T-Bills, PKR 2.2 trillion through 3-month T-Bills, PKR 1.2 trillion through 6-month T-Bills, and PKR 1.6 trillion through 12-month T-Bills.

Participation in fixed-rate Pakistan Investment Bonds (PIBs) remained steady during the quarter, with total bids amounting to PKR 3.415 trillion (realized value). However, investors demanded relatively higher yields amid geopolitical uncertainty and concerns over the future direction of interest rates.

The government raised PKR 1.1 trillion (realized value), including non-competitive bids, against its target of PKR 1.0 trillion.

Of the total amount raised, PKR 55 billion was accepted through 2-year zero-coupon PIBs, PKR 323 billion through 3-year PIBs, PKR 381 billion through 5-year PIBs, PKR 299 billion through 10-year PIBs, and PKR 69 billion through 15-year zero-coupon PIBs.

Floating-rate PIB auctions were discontinued during the quarter, and no auctions were conducted during the period.

Investor demand for fixed-rate Ijara Sukuk remained strong during the quarter, with total bids amounting to PKR 2.4 trillion. The government raised PKR 882 billion against its target of PKR 1.075 trillion.

Of the total amount raised, PKR 550 billion was accepted through shorter-tenor Ijara Sukuk of 3 months, 6 months, and 12 months, while PKR 332 billion was raised through Sukuk with tenors ranging from 3 to 10 years.

During the quarter, the Ministry of Finance (MoF) introduced 3-month and 6-month Ijara Sukuk, providing additional short-term investment options for Islamic financial institutions. The introduction of these instruments also helped in developing the short-term Islamic yield curve.

Investor participation in Variable rate Ijara Sukuk remained strong during the quarter, with auctions limited to the 10-year Variable Rental Rate (VRR) Sukuk.

Total bids amounted to PKR 3.3 trillion, of which the government accepted PKR 519 billion against its target of PKR 525 billion.

The Board oversees sustainability-related risks, including environmental, social, and governance factors, which may impact the Company's operations and performance. These risks are regularly identified, assessed, and monitored, and are managed through a robust system of internal controls, compliance mechanisms, and ongoing oversight to ensure effective mitigation and alignment with applicable regulatory requirements and evolving best practices.

The Company is also committed to promoting diversity, equity, and inclusion across all levels of the organization. The Company continues to foster an inclusive workplace through equal opportunity, fair treatment, and transparent human resource practices. The Board remains focused on continuously strengthening sustainability initiatives and DE&I measures in line with regulatory expectations and emerging standards.

Future Outlook

Looking ahead, the war in the middle east and its longevity will play a crucial role in the direction of the broader economy in the short-to-medium term. The forward-looking trajectory of inflation and interest rate remains highly susceptible to persistence of higher oil prices and its ripple effect on the economy. Owing to the ongoing crises, IMF has revised Pakistan's inflation forecast upwards to 9.9% in FY27 from its earlier projection of 8.4%. As a result, the forthcoming meeting of the monetary policy committee of SBP scheduled on October 26th, 2026 will be a key catalyst for the stock market and the broader economy as the treasury market signals currently indicate expectations of potential a interest rate increase of ~50-100bps which appears to have been largely priced in by the stock market participants as the index is currently trading at a forward PE multiple of 7.0-7.5x.

19. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that

reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The Fund does not hold any financial assets or liabilities carried at fair value as at September 30, 2026.

The table below provides information on financial assets or liabilities carried at fair values, by valuation methods as at September 30, 2026.

	As at September 30, 2026 (un-audited)
